PROFILE

- Graduate student at Carnegie Mellon University, passionate about technology, life-long learning, and sports.
- Excels in Statistical Computing, with a strong foundation in data structures and algorithms.

EDUCATION

Carnegie Mellon University

Pittsburgh, PA

Master of Science in Applied Data Science

Expected May 2027

- Relevant Fall 2026 Courses: Applied Linear Models, Statistical Computing, Data Visualization, Data Engineering
- Relevant Spring 2027 Courses: Statistical Machine Learning, Time Series, Statistical Practicum (Corporate Capstone)

Middlebury College

Middlebury, VT

BA in Statistics

May 2026

- Relevant Coursework: Statistical Consulting, Statistical Learning, Time Series Analysis, Bayesian Statistics, Probability, Statistical Inference, Linear Algebra, Multivariable Calculus

BA in Molecular Biology and Biochemistry

- Relevant Coursework: Organic Chemistry, Biochemistry of Macromolecules, Molecular Genetics, Topics in Biotechnology, Future of RNA, Cell Biology

SKILLS

- Programming Languages and Platforms**: R, RStudio, SQL, Python (NumPy, Pandas, Scikit-Learn, TensorFlow, PyTorch)
- Machine Learning**: Regression, Classification, Clustering, Decision Trees, Statistical Analysis
- Functional Skills**: Collaboration, Oral and Written Communication, Agile Software Lifecycle Delivery Methodologies, Leadership, Stakeholder Management, Problem Solving Mentality
- Domain Experience**: Life Sciences Research & Development, Data Analytics

RELEVANT EXPERIENCE

Teaching Assistant

Middlebury, VT

Middlebury Department of Mathematics & Statistics

August 2025 – December 2025

- Supported students learning statistical modeling, machine learning, and data analysis by facilitating help sessions.
- Helped students develop proficiency with R and RStudio to implement methods such as classification, clustering, and tree-based models.
- Strengthened communication and mentoring skills by explaining complex statistical concepts in accessible ways and providing individualized support during coursework.

Research Assistant

Middlebury, VT

Middlebury Department of Mathematics & Statistics

May 2025 – August 2025

- Conducted analysis of LC–MS metabolic data using MS-Dial and R to identify metabolites with distinct behavioral patterns in the oral biome.
- Collaborated on an interdisciplinary study using my understanding of biochemistry and statistics, applying algorithmic methods with the potential application of faster diagnosis.

Lab Assistant

Middlebury, VT

Middlebury Department of Chemistry

August 2024 – May 2025

- Assisted in developing and testing chemical reactions, focusing on improving efficiency and selectivity in organic synthesis.
- Gained hands-on experience with specialized lab equipment including gloveboxes, photoreactors, and analytical tools (GC–MS, NMR).
- Strengthened communication and mentoring skills by explaining complex statistical concepts in accessible ways and providing individualized support during coursework.

ACADEMIC PROJECTS

Understanding Hoary Bat Migration

January 2026 - Present

- Analyzed acoustic detections of Hoary Bats to identify seasonality in migration patterns.
- Assessed species migration status to inform project planning for wind energy development.

Photocatalytic Demethylation of Dimethylbenzylamine in Oxygen-Free Conditions

August 2024 – May 2025

- Worked in collaboration to identify opportunities to improve the process of demethylation.

Position Flexibility in Premier League

May 2025

- Applied both unsupervised and supervised algorithms to determine whether Premier League players show statistical affinities for positions
